SUMMARY

I am a passionate programmer with a solid foundation in software development and hands-on experience as a Registry Assistant. My strengths lie in data management, problem-solving, and effective communication. I actively seek out new challenges to grow and sharpen my skills. I thrive in collaborative environments where I can contribute my technical expertise while supporting others. With a strong blend of technical and organizational abilities, I aim to make a meaningful impact in roles that bridge innovation and practical outcomes.

EXPERIENCE

SOFTWARE DEVELOPER

Ministry of Industry and Commerce - Internship
February 2025 - April 2025

- Developed and maintained projects using C# and SQL Server, ensuring efficient functionality and data management.

REGISTRY ASSISTANT

Bahrain Polytechnic - Internship
une 2023 - August 2024

- Managed student records, organized archives, and served as a primary contact for students and staff.

- Fluent in English

PhotoNest Website

Associated with Bahrain Polytechnic ~ September 2024 - December 2024

PhotoNest is a web-based photo organizer built with HTML, CSS, JavaScript, and Firebase for seamless image management, storage, and sharing. Features include a social home feed, advanced search, album organization, private vault, spam reporting, and an admin dashboard for moderation. Designed with a light purple theme, intuitive UI, and scalable architecture for future enhancements. Prioritizes security, privacy, and a smooth onboarding experience.

Orient Event Organizer Website

Associated with Bahrain Polytechnic ~ Feburary 2024 - May 2024

A PHP, HTML, and CSS based reservation platform developed for the Database Programming 2 course at Bahrain Polytechnic. Designed for seamless venue booking, user authentication, event management, and automated client status updates using SQL triggers and procedures. Built with a focus on accuracy, security, and efficiency to enhance the booking experience for both clients and administrators.

LabCaught Application

Associated with Bahrain Polytechnic ~ September 2023 - January 2024

Developed login, registration, error handling, and support features for a Swift-based hospital test booking app. Implemented user authentication, detailed error pop-ups, contact support guidance, and terms & conditions to ensure a seamless, secure, and user-friendly experience.

SHOOQ JANAHI
SOFTWARE DEVELOPER

electronic learning management system (eLMS)
Associated with Bahrain Polytechnic ~ September 2023 - December 2023

Developed using C# and Microsoft SQL Server in Visual Studio, this project aimed to enhance student, teacher, and administrator engagement at Bahrain Polytechnic. My contributions included designing activity diagrams to map system workflows, ensuring a structured and efficient development process.

Bahrain Polytechnic Gym Application
Associated with Bahrain Polytechnic ~ February 2023 - June 2023

Java-based management system for Bahrain Polytechnic's gym, featuring a graphical user interface for efficient member, employee, and personal trainer management. Enables adding, updating, and deleting records, along with personal trainer assignments, ensuring a streamlined administration process.

Extinct Animal Website
Associated with Bahrain Polytechnic ~ September 2022 - December 2022

A captivating educational platform developed using HTML, CSS, and JavaScript, designed to raise awareness about extinct species through engaging and well-structured content. The site features detailed species profiles, behind-the-scenes pages like "Making of EA," and interactive elements that enhance the user experience. Built with a focus on storytelling and accessibility, it combines strong documentation and front-end development skills to deliver a seamless and informative journey for users.
