ABOUT ME

Full-stack developer with experience building scalable web and mobile applications using C#, ASP.NET, Java, Spring Boot, SQL Server, Flutter, Dart, JavaScript, and Firebase. Strong in API integration, problem-solving, UI/UX thinking, and delivering clean, maintainable code. Experienced in developing government and enterprise systems, with hands-on exposure to data analysis, data visualization, and data-driven decision-making, including working with datasets, KPIs, and analytical dashboards.

WORK EXPERIENCE

Gulf Air Group (GFG) — December 2025 - Present
IT Service Desk Analyst

- Assisted staff by troubleshooting and resolving technical issues, ensuring smooth daily operations and providing timely IT support.

Information & eGovernment Authority — July 2025 - November 2025
Government System Developer Trainee

- Selected as part of a national strategic initiative launched by the Information & eGovernment Authority (iGA) in collaboration with the Ministry of Labour to train and empower Bahraini graduates in key IT fields. The program focused on developing technical proficiency, innovation, and job-market readiness in alignment with Bahrain's Economic Vision 2030. As part of this initiative, my work involves revamping legacy government systems by designing and building modern, scalable solutions using Java, Spring Boot, Angular, HTML, CSS, and JavaScript, ensuring improved performance, maintainability, and user experience.

Ministry of Industry and Commerce — February 2025 - April 2025
Software Developer

- Developed and maintained projects using C# and SQL Server, ensuring efficient functionality and data management.

Bahrain Polytechnic — June 2023 - Augest 2024
Registry Assistant

My tasks included:
- Input and maintain accurate student in the institution's database.
- Maintain an organized system for archiving records, ensuring that physical documents are easily retrievable.
- Served as a point of contact for students and staff

CERTIFICATIONS

SOFTWARE ENGINEERING (SOFTWARE ARCHITECTURE FOR BIG DATA) L2
Institution: Coursera ~ September 2025

One Million Prompters
Institution: Dubai Future Foundation ~ July 2025

Complete web Development Course
Institution: Udemy ~ April 2025

Introduction to Data Science
Institution: Cisco ~ March 2025

Galactic Problem Solver
Institution: NASA International Space Apps Challenge ~ October 2024

Microsoft Certified: Power Platform Developer Associate
Institution: Microsoft ~ May 2024

Essentials of Career Development
Institution: ThinkSmart for Development and Training ~ May 2024

Ethical Use of AI Applications in Learning
Institution: Bahrain Polytechnic ~ February 2024

Project Managment
Institution: INJAZ AL-Arab ~ February 2024

PROJECTS

Shift Handover System   March 2025 - May 2025

- Developed using C#, ASP.NET MVC, Microsoft SQL Server, and QuestPDF, this web-based system was designed to assist shift supervisors in managing and documenting shift activities. The application features secure user authentication, shift claiming, and logging of incidents, accidents, and manpower details. Upon shift closure, the system auto-generates a structured PDF report using QuestPDF. The system ensures accountability, data integrity, and smooth handovers between shifts with a focus on usability and accuracy.

Bahrain Air Transport Analytics Dashboard   January 2025 - March 2025

- Developed an interactive web-based analytics dashboard using HTML5, CSS3, and JavaScript to visualize key aviation traffic indicators for Bahrain International Airport by consuming live data from Bahrain's Open Data Portal (REST APIs). Analyzed monthly passenger, aircraft, and air cargo movements, generating KPIs such as busiest months, yearly totals, and monthly averages through client-side data cleaning, aggregation, and analysis. Implemented interactive time-series visualizations with Chart.js and designed a responsive, user-friendly interface that simulates real-world aviation and air transport analytics tools.

PROJECTS

PhotoNest Website   September 2024 - December 2024

Associated with Bahrain Polytechnic

- PhotoNest is a web-based photo organizer built with HTML, CSS, JavaScript, and Firebase for seamless image management, storage, and sharing. Features include a social home feed, advanced search, album organization, private vault, spam reporting, and an admin dashboard for moderation. Designed with a light purple theme, intuitive UI, and scalable architecture for future enhancements. Prioritizes security, privacy, and a smooth onboarding experience.

Orient Event Organizer Website   February 2024 - May 2024

Associated with Bahrain Polytechnic

- A PHP, HTML, and CSS based reservation platform developed for the Database Programming 2 course at Bahrain Polytechnic. Designed for seamless venue booking, user authentication, event management, and automated client status updates using SQL triggers and procedures. Built with a focus on accuracy, security, and efficiency to enhance the booking experience for both clients and administrators.

LabCaught Application   September 2023 - January 2024

Associated with Bahrain Polytechnic

- Developed login, registration, error handling, and support features for a Swift-based hospital test booking app. Implemented user authentication, detailed error pop-ups, contact support guidance, and terms & conditions to ensure a seamless, secure, and user-friendly experience.

Electronic Learning Management system (eLMS)   September 2023 - December 2023

Associated with Bahrain Polytechnic

- Developed using C# and Microsoft SQL Server in Visual Studio, this project aimed to enhance student, teacher, and administrator engagement at Bahrain Polytechnic. My contributions included designing activity diagrams to map system workflows, ensuring a structured and efficient development process.

Bahrain Polytechnic Gym Application   February 2023 - June 2023

Associated with Bahrain Polytechnic

- Java-based management system for Bahrain Polytechnic's gym, featuring a graphical user interface for efficient member, employee, and personal trainer management. Enables adding, updating, and deleting records, along with personal trainer assignments, ensuring a streamlined administration process.
